# THE DETAILS

*Parquet that tells stories*

The Used Look products tell a story and give a room warmth. The worn edges and the beautiful patina are characteristic of these trendy products. The appearance of these floors lives from their traces of wear, which become even more beautiful over the course of time. This makes the Used Look products very easy to handle and particularly easy to clean. The structure of the wood is clearly visible through the patina and gives it its own unique charm, which simply catches the imagination and calls up dreams of times long past.

Precisely because of their „used“ appearance, these floors are the perfect partner for a modern style with personality.
